ABOUT

Computer Engineering student CGPA 9.86(till 5th Sem) who has architected and shipped four full-stack applications including AI-powered voice and interview platforms integrating OpenAI GPT-4, Vapi, and ElevenLabs owning every layer from database schema to deployed UI. Completed two industry internships delivering production features under senior engineering mentorship. Seeking to apply full-stack ownership and a systems-first mindset to high-impact engineering problems.

EDUCATION

Pimpri Chinchwad College of Engineering and Research, Pune

2023–2027

B.E Computer Engineering- CGPA 9.86 (till 5th Sem)

SNBP Jr College Rahatani, Pune HSC — 88%

2023

St Joseph's Convent High School, Pune SSC — 92%

2021

PROJECTS

WanderLust – Full-Stack Travel Website

github.com/hitakshi13/wanderlust

- Engineered and deployed a full-stack travel platform (Node.js, Express.js, MongoDB, Mapbox API) following MVC architecture, built Mapbox integrated destination cards with real-time filtering and a responsive UI across all device sizes.

PrepWise – AI-Powered Mock Interview Platform.

github.com/hitakshi13/ai_mock_interviews

- Designed and built an AI mock interview platform (Next.js, Gemini AI, Firebase, MongoDB) generating 5–10 dynamic questions per session, configurable by role and difficulty, automated feedback scoring and progress tracking via a real-time voice interface.

Converso – AI Voice Companion Platform

github.com/hitakshi13/saas-app

- Architected a full stack AI voice companion platform (Next.js, OpenAI GPT-4, ElevenLabs, Supabase, Clerk) supporting distinct AI tutor personas with custom voice profiles, implemented speech-to-text pipelines, secure authentication, and a Tailwind mobile-first UI onboarding initial users at launch.

Zerodha Stock Trading Clone – MERN Stack

github.com/hitakshi13/stock-app

- Built a full-stack Zerodha inspired stock trading interface (MongoDB, Express.js, React.js, Node.js) featuring a live portfolio dashboard, watchlist management, and order simulation demonstrating end-to-end MERN architecture and real-world financial UI patterns.

PlaceTrack – AI-Powered Campus Placement Tracker

github.com/hitakshi13/placeTrack

- Architected and deployed a production grade full stack Placement Management System using Next.js 14, TypeScript, PostgreSQL, Prisma, and NextAuth v5, featuring role based access control, real time application tracking, automated eligibility filtering, salary analytics dashboards with Recharts, and an AI Interview Coach powered by Groq (Llama 3.3 70B) for company-specific preparation and personalised placement roadmaps.

EXPERIENCE

Web Development Intern Maxgen Technologies Pvt. Ltd.

Dec 2025 – Jan 2026

- Sole developed the core ticket booking and search module of a full-stack Train Ticket Booking System; collaborated with senior engineers in a structured SDLC environment and delivered a production-ready feature within a 1 month internship timeline.

Web Development Intern SkillCraft Technology

Nov 2025 – Dec 2025

- Implemented and debugged web development features in a real-world production codebase under technical mentorship, applied software engineering best practices to build, test, and maintain reliable functionality delivering all milestones on schedule.

TECHNICAL SKILLS

Frontend: React.js, Next.js 14, Tailwind CSS.

Languages: C++, JavaScript (ES6+), TypeScript, Python

Backend: Node.js, Express.js, FastAPI, REST API

AI / Integrations: OpenAI GPT-4, Vapi, ElevenLabs, Gemini AI

Databases: MongoDB, Firebase, Supabase, MySQL.

Auth & Security: Clerk, JWT, secure authentication flows

Dev Tools: Git, GitHub, Postman, Figma, VS Code

CS Fundamentals: DSA, DBMS, OS, Computer Networks, Software Engineering
